

# Journal of Fluid Mechanics

VOLUME 742

- 1 The surprising relevance of a continuum description to granular clusters  
**M. Y. Louge**
- 5 Adding in-line motion and model-based optimization offers exceptional force control authority in flapping foils  
**J. S. Izraelevitz & M. S. Triantafyllou**
- 35 Detrainment from a turbulent plume produced by a vertical line source of buoyancy in a confined, ventilated space  
**C. Gladstone & A. W. Woods**
- 50 Stochastic dynamics of active swimmers in linear flows  
**M. Sandoval, N. K. Marath, G. Subramanian & E. Lauga**
- 71 Wavepacket models for supersonic jet noise  
**A. Sinha, D. Rodríguez, G. A. Brès & T. Colonius**
- 96 Erythrocyte responses in low-shear-rate flows: effects of non-biconcave stress-free state in the cytoskeleton  
**Z. Peng, A. Mashayekh & Q. Zhu**
- 119 The turbulent/non-turbulent interface and entrainment in a boundary layer  
**K. Chauhan, J. Philip, C. M. de Silva, N. Hutchins & I. Marusic**
- 152 Unsteady propulsion near a solid boundary  
**D. B. Quinn, K. W. Moored, P. A. Dewey & A. J. Smits**
- 171 Velocity statistics in turbulent channel flow up to  $Re_\tau = 4000$   
**M. Bernardini, S. Pirozzoli & P. Orlandi**
- S 192 Turbulent wake behind a curved circular cylinder  
**J. P. Gallardo, H. I. Andersson & B. Pettersen**
- 230 A Kolmogorov-like exact relation for compressible polytropic turbulence  
**S. Banerjee & S. Galtier**
- 243 Coins falling in water  
**L. Heisinger, P. Newton & E. Kanso**
- 254 Transient growth in linearly stable Taylor–Couette flows  
**S. Maretzke, B. Hof & M. Avila**
- 291 Velocity–vorticity correlation structure in turbulent channel flow  
**J. Chen, F. Hussain, J. Pei & Z.-S. She**
- 308 An experimental study of the free evolution of rotating, nonlinear internal gravity waves in a two-layer stratified fluid  
**H. N. Ulloa, A. de la Fuente & Y. Niño**
- 340 Maximum palinstrophy growth in 2D incompressible flows  
**D. Ayala & B. Protas**
- 368 On multiphase turbulence models for collisional fluid–particle flows  
**R. O. Fox**
- 425 Effect of a distant rigid wall on microstreaming generated by an acoustically driven gas bubble  
**A. A. Doinikov & A. Bouakaz**
- S 446 Effects of magnetic field on the turbulent wake of a cylinder in free-surface magnetohydrodynamic channel flow  
**J. R. Rhoads, E. M. Edlund & H. Ji**
- 466 Effects of distributed pressure gradients on the pressure–strain correlations in a supersonic nozzle and diffuser  
**S. Ghosh & R. Friedrich**
- 495 Forced spreading of films and droplets of colloidal suspensions  
**L. Espín & S. Kumar**
- 520 Streak evolution in viscoelastic Couette flow  
**J. Page & T. A. Zaki**
- 552 On the origin of the flip–flop instability of two side-by-side cylinder wakes  
**M. Carini, F. Giannetti & F. Auteri**
- 577 Growth of multiparticle aggregates in sedimenting suspensions  
**A. Z. Zinchenko & R. H. Davis**

2014

## SUBSCRIPTIONS

The *Journal of Fluid Mechanics* (ISSN 0022-1120) is published *semimonthly* in 24 volumes each year by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK/Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA. The subscription price (excluding VAT but including postage) for volumes 738–761, 2014, is £3279 or \$6053 (online and print) and £2816 or \$4933 (online only) for institutions; £910 or \$1686 (online and print) and £865 or \$1503 (online only) for individuals. The print-only price available to institutional subscribers is £3163 (US \$5567 in USA, Canada and Mexico). Single volumes cost £143 (US \$251 in the USA, Canada and Mexico) plus postage. Orders, which must be accompanied by payment, should be sent to any bookseller or subscription agent, or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, NY 10994-2133. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air. Copies of the *Journal* for subscribers in the USA, Canada and Mexico are sent by air to New York. Periodicals postage is paid at New York, NY, and at additional mailing offices. **POSTMASTER:** send address changes in USA, Canada and Mexico to *Journal of Fluid Mechanics*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133. Claims for missing issues can only be considered if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

## COPYING

The Journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA which are also registered with CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/2014/\$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information on *Journal of Fluid Mechanics* is available on [journals.cambridge.org/FLM](http://journals.cambridge.org/FLM). For further information on other Press titles access [cambridge.org/](http://cambridge.org/).

Readers should note that where reference is made to a Web site for additional material relating to an article published in *Journal of Fluid Mechanics* this material has not been refereed and the Editors and Cambridge University Press have no responsibility for its content.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the World's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

Printed in the UK by Bell & Bain Ltd.

The picture on the cover is based on figure 4 of 'Ship waves in the presence of uniform vorticity', by S. Å. Ellingsen.

© Cambridge University Press 2014

618 Controlled reattachment in separated flows: a variational approach to recirculation length reduction  
**E. Boujo & F. Gallaire**

636 Natural convection with mixed insulating and conducting boundary conditions: low- and high-Rayleigh-number regimes  
**P. Ripesi, L. Biferale, M. Sbragaglia & A. Wirth**

### JFM Rapids (online only)

R1 Capillary and viscous perturbations to Helmholtz flows  
**M. R. Moore, H. Ockendon, J. R. Ockendon & J. M. Oliver**

R2 Ship waves in the presence of uniform vorticity  
**S. Å. Ellingsen**

S 664 Steady-state resonance of multiple wave interactions in deep water  
**Z. Liu & S.-J. Liao**

701 Spatially varying mixing of a passive scalar in a buoyancy-driven turbulent flow  
**D. D. J. A. van Sommeren, C. P. Caulfield & A. W. Woods**

721 ERRATUM

R3 An idealised assessment of Townsend's outer-layer similarity hypothesis for wall turbulence  
**D. Chung, J. P. Monty & A. Ooi**
